

Controlnautas × Muse AI

Industrial B2B is **not** a shopping cart.

Engineers need verified specs, live stock, and a preliminary quote **before** anyone is allowed to buy.

Hack Day 2026 · <https://data.controlnautas.com/us>

Who we are

Controlnautas – authorized distributor of industrial electronics
(Horner, NOVUS, PLC/HMI, process control, sensors).

Factories do **not** buy controllers like household appliances.

- Insurance only allows certified equipment
- Liability: manufacturer + installer + integrator
- A wrong SKU can stop a plant

Nobody buys through an online cart

Purchases need multiple approvers:

- Plant engineers
- Factory managers
- Logistics leads

Cycles last **days → months → years.**

Large volumes = zero tolerance for error.

Always starts with a **technical sales engineer.**

What the engineer needs first

1. Real technical documentation (clear **Markdown** / datasheets)
2. Proof it meets **plant norms and standards**
3. Validation with a technical sales engineer

Price comes later. **Fit and proof come first.**

Why scraping the web fails

- Critical specs often are **not on the public web**
- LLMs invent or confuse I/O, protocols, mounting
- Storefront stock/price can be **stale**
- No evidence chain → engineer cannot trust it
- Sales repeats the same Q&A for weeks

The unlock: Muse AI → our API

Muse reads Controlnautas **directly via API** – not by guessing HTML.

Muse gets	Why it matters
Specs + sources	Evidence-backed verdict
Live stock / price	Real Medusa truth
Preliminary quote PDF	Sales starts faster

The LLM analyzes. Humans still authorize the buy.

What we built (Hack Day)

Ask Muse → match config → verify facts → price/stock → quote PDF

```
GET /healthz
GET /api/muse/v1/products/search
POST /api/muse/v1/evaluate
GET /api/muse/v1/products/{id}/offer
POST /api/muse/v1/preliminary-quotes
```

Stack: Medusa 2 · Next.js 15 · Postgres · Caddy HTTPS

Demo: data.controlnautas.com

Demo catalog (live)

SKU	Product	USD	Stock
CN-X5PRIME-HE-XP5	Horner X5 Prime OCS	890	3
CN-N1200	NOVUS N1200	480	2
CN-THT02	TZ THT-02 Modbus sensor	75	8

Real manufacturer docs + photos from controlnautas.com

Business impact

- **Faster cycle** – requirement → validated option → quote
- **Less sales load** – stop re-answering datasheet questions
- **Fewer errors** – API truth for plant / logistics approval

We will run this in the real Controlnautas company.

Next

Muse AI is free today · it will scale · the assistant is already with the engineer.
